POPULAR SCIENCE MONTHLY

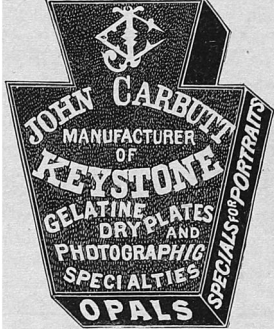

Conducted by
E. L. & W. J. YOUMANS.

THE POPULAR SCIENCE MONTHLY for 1886 will continue, as heretofore, to supply its readers with the results of the latest investigation and the most valuable thought in the various departments of scientific inquiry.

Leaving the dry and technical details of science, which are of chief concern to specialists, to the journals devoted to them, the MONTHLY deals with those more general and practical subjects which are of the greatest interest and importance to the public at large. In this work it has achieved a foremost position, and is now the acknowledged organ of progressive scientific ideas in this country.

THE GRAND ARMY REVIEW,
AN ADVOCATE OF
Veterans' Rights.

A Record of hitherto "unwritten history," an exchange for reminiscences, campaign jokes, songs and stories, pathetic and otherwise, an active exponent in genuine F. C. & L. of news and legislation affecting the old soldiers and sailors, their widows and orphans, an encyclopedia of information, not obtainable elsewhere, for the National Guard, the Sons of Veterans, and other organizations who may be called on in the future to follow the example of the Grand Army of the Republic. It is circulated among comrades, from Privates to Major-Generals, from Cape Cod to California, from Maine to Texas, and has been warmly commended by all who have seen it. Every month there are mailed not less than 10,000 copies of the magazine, the form of which is such that it can be easily preserved for future reference.

Address:
GRAND ARMY PUBLISHING CO.,
98 Maiden Lane, New York.

Inspection of the second floor of the establishment of

The Dyeing of Textile Fabrics.

By J. J. HUMMEL, F. C. S.,
Professor and Director of the Dyeing Department
of the Yorkshire College, Leeds.

WITH NUMEROUS DIAGRAMS.

1 Vol., 12mo, Extra Cloth, Price, \$2.

The object of this Manual is to provide the teacher and student of dyeing with a useful text-book, giving exact scientific and practical information. It is intended also to supply the practical dyer with explanations of the scientific principles involved in the varied operations connected with his art, not only that he may take a more intelligent interest in his work, but that he may be stimulated to criticise it, and, by means of well-devised experiments, to determine whether his methods are rational and incapable of improvement, or the reverse.
